Ser Jacopo S2 B Maxima Maxima - Cubist Design & Rationalist Form

The **Ser Jacopo S2 B Maxima Maxima** is one of the most avant-garde expressions to emerge from the Pesaro workshop. This pipe departs from traditional organic shapes to embrace a **minimalist, modern design**, characterized by sharp lines and geometric volumes that echo the principles of Rationalist architecture.

Geometric Architecture: The "Square Shank"

This model is a **Quarter Bent Stand-Up** free-form pipe, conceived as a sculptural piece capable of standing independently. The design is defined by a rigorous arrangement of volumes:

- **Squared Bowl:** The bowl abandons traditional circularity for a cubic geometry. Its sharp edges and flat planes emphasize a modern, architectural aesthetic.
- **Square Shank:** The shank continues the clean lines of the bowl, creating a seamless visual flow that provides structural strength and a bold profile.
- **"Maxima Maxima" Dimensions:** This classification is reserved for pipes of exceptional scale. It features an extra-large chamber with impeccable cylindrical boring, ideal for those who prefer long, voluminous smoking sessions.

Finish and Materials

Despite its commanding size, the pipe maintains a sophisticated elegance through precise technical choices:

- **Light Sandblasting:** The sandblasted finish is delicately applied to respect the sharpness of the edges. This process highlights the briar's natural texture without softening the rigor of its geometric form.
- **Tapered Stem:** Crafted from high-grade black acrylic, the **tapered** mouthpiece streamlines the overall silhouette, ensuring excellent ergonomic comfort and a balanced draw.

The **S2 B** marking identifies high-quality briar combined with the complex craftsmanship required to achieve such defined angles and perfect flat surfaces. It is a smoking instrument dedicated to the collector seeking a fusion of **Italian tradition** and **contemporary Minimalist aesthetics**.
