Model	Cherrywood
Finish	Rusticated, Semi Rusticated
Shape	Half bent
Material	Briar-root
Stem	Acrylic
Original bag	of the manufacturer
Original box	Al Paschià

FEATURES

Handmade in Italy (made in 2026)

Free gift wrapping is included

Radice Rind Pipe (2026) - Artisan Cherrywood with Candle-Wax Effect

The **Cherrywood version of the Radice Rind** (crafted in 2026) features a compact silhouette packed with immense character.

Aesthetics and the Matchless "Candle-Wax Effect"

The body of the pipe is finished with a semi-rusticated texture, dominated by a **deep, sculptural black rustication**. However, the true focal point of the design is the striking "dripping candle-wax effect":

- **The Color Contrast:** The rim and the top of the bowl have been intentionally left in their light, natural stain, creating a clean and sophisticated contrast with the black body.
- **The Craftsmanship:** A partial, hand-calibrated rustication on this lighter section beautifully mimics the natural grain and flow of melting wax.

Tapered Design and the Practicality of the Flat Base

The Cherrywood shape is historically praised for its exceptional ergonomics, and this Radice interpretation maximizes its practical benefits:

- **The Ideal Desk Pipe:** Thanks to its signature **flat base**, this pipe is a perfect sitter (self-standing). It can be rested effortlessly on any flat surface without the risk of tipping over or spilling ash, making it the ideal companion for anyone working at a computer or spending time at a desk.
- **The Stem:** The overall line is beautifully completed by a sleek, **tapered black acrylic stem** with a high-polish finish.

Chamber Geometry and Architecture

Despite its overall compact dimensions, the internal architecture is engineered to guarantee an extended and deeply satisfying smoke:

- **Generous Capacity:** In perfect proportion to the instrument's size, the bowl boasts a **rather abundant capacity**, excellent for enjoying long smoking sessions.
- **Chamber Bore:** The internal chamber bore is **slightly conical**. This geometry accommodates the natural downward progression of the ember toward the bottom of the bowl, ensuring a smooth, steady draw and an optimal expression of the tobacco's aromatic profile.
