Valbruna by Simone Gaudenzi Pipe - Smooth Brown 2 Jellyfish: Slender Architecture and Stand-Up Character

*This specific model captures the attention of collectors due to its bold design: a slender interpretation that merges the vertical elegance of the **Chimney** with the stability and functionality typical of the **Cherrywood**.*

Structural Design, Proportions, and Briar Finish

The uniqueness of this piece lies in the balanced contrast between

its dimensions. While maintaining an overall medium length, the pipe is dominated by an impressive Chimney bowl standing a remarkable **82 mm** high. Thanks to the geometry of its base, this model is an authentic **stand-up**, capable of supporting itself when placed on a flat surface, thus combining practicality with a strong visual presence.

- **Smooth Brown Finish:** The warm, deep brown coloring has been applied to enhance the natural grain pattern of the briar.
- **Natural Edge Inserts (Bark Top):** In perfect contrast to the smooth surface, the artisan chose to preserve the natural plateau crust (**bark top**) in two strategic areas: on the rim of the bowl and on the end of the shank where the stem meets, giving the piece an organic yet rustic appearance.

The Stem: A Faux Army Mount

Another element of great interest to the connoisseur is the work done on the **black ebonite** stem—a material traditionally favored for its comfort on the teeth. The mouthpiece features a **slightly fishtail** shape to optimize smoke flow and ergonomics.

- **The Optical Illusion of the Mount:** Aesthetically, the transition between the shank and the stem is shaped to simulate a spigot or **Army mount**. In reality, it features a **traditional tenon**, an engineering solution that guarantees maximum structural stability without sacrificing the rigorous look of military-style models.
- **The Silver Hallmark:** Embedded on the top of the stem is the **silver Medusa logo**, the emblem of the line and the seal of authenticity from the Valbruna workshop.
- **Extra-Deep Bowl:** The remarkable height of the head houses a highly capacious combustion chamber, perfect for long and meditative smoking sessions.
- **Slightly Conical Drilling:** The internal chamber features a **slightly conical drilling**.
