Peder Jeppesen Ida Gr. 5 Pipe - Smooth Freehand with Double Band

*This pipe belongs to the **Ida Gr. 5** grading.*

Structural Features and Design

*The model stands out for its **Freehand** shape and **bent** profile—a silhouette that ensures excellent balance whether held in the mouth or in the hand.*

The bowl merges the classic lines of an **Apple** with the sturdiness of a **Pot**, creating a solid and harmonious geometry. The smooth finish is further enhanced by a striking **contrast staining**.

The shank features a **double acrylic band** that alternates deep black with a colored insert, creating a contemporary chromatic contrast before transitioning into the stem. The stem, also crafted from black acrylic, features a **fishtail** design to ensure maximum anatomical comfort during smoke sessions.

Technical Features

- **Thick Walls:** The generous amount of briar around the chamber acts as an excellent thermal insulator, keeping the pipe cool to the touch even during prolonged smokes.
- **Capacious Chamber:** Ideal for tobaccos that require complex development or for long-lasting smokes.
- **Cylindrical Drilling.**
- **Dimensions:** This pipe falls into the **medium-sized** category, combining the substance of a substantial bowl with optimal portability.

Grading Note: The **Ida** series represents Jeppesen's lines dedicated to his daughter, synonymous with a meticulous selection of raw materials. The **Grade 5** designation attests to the high quality standard of the briar used, which is free of structural flaws and characterized by a particularly prized grain pattern.
