2. Bowl height	50 mm / 1.97 inch
3. Outside diameter	40 mm / 1.57 inch
4. Chamber diameter	20 mm / 0.79 inch
5. Chamber depth	35 mm / 1.38 inch
 Weight	63.40 gram / 2.24 oz
<b>Filter</b>	<b>NO</b>
Condition	New
Country	Italy
Brand	Accademia della Pipa
Model	Freehand, Chubby
Finish	Smooth
Shape	Bent
Material	Briar-root
Stem	Ebonite
Ornament	Acrylic
Original bag	of the manufacturer
Original box	Al Paschià

### FEATURES

Handmade in Italy

Free gift wrapping is included

#### **Francesco Ganci FF Grading Pipe - Smooth Natural Freehand Chubby**

The **Francesco Ganci** pipe, marked by the prestigious **FF** grading, is a masterpiece of excellence that testifies to the high technical level of the Ligurian pipemaker, an esteemed **Maestro of the Accademia della Pipa**. This specific model unfolds as a smooth **freehand** shape of compact dimensions, interpreting

the Chubby style through a refined balance between generous wall thickness and reduced overall length.

#### *Chubby Architecture and Natural Finish*

The design of this piece plays on the concentration of mass to offer a solid and extremely comfortable smoking instrument:

- **The Proportions:** The pipe features a **medium-sized bowl** paired with a **short overall length**. This Chubby geometry concentrates the weight close to the hand's center of gravity, ensuring exceptional ergonomics and making the piece light between the teeth and convenient to carry.
- **The Natural Finish:** The smooth finish is completed with a natural staining, a choice that does not mask the briar but instead celebrates its purity.
- **The Chamber:** The bowl boasts a **good capacity** relative to its external dimensions, with an internal drilling that features a subtle taper.

#### *The Shank Transition and Elforyn Band*

The junction point between the briar body and the stem displays an extraordinary continuity of lines:

- **The Flared Shank:** The terminal part of the shank develops with a **flared section**, a structural solution that enhances the pipe's visual solidity and guarantees a robust fit.
- **The Elforyn Inlay:** Seamlessly joining the shank is an **Elforyn band** integrated into the stem.
- **The Material:** Elforyn is a high-tech material of the highest quality, composed of a mixture of mineral raw materials and acrylic resins. Developed to replicate the visual properties, density, and tactile pleasure of natural ivory, Elforyn offers an ivory-cream color contrast of great structural elegance, with the advantage of being completely stable, unalterable, and compliant with environmental regulations.

#### *Hand-Cut Ebonite Stem*

The stem is finished according to the standards of the highest artisan school:

- **Craftsmanship:** The stem is entirely **turned and hand-cut from a premium black ebonite rod**, the material of choice for experienced smokers due to its proverbial softness and flexibility under the teeth.
- **Termination:** The profile flows into a finely crafted **fishtail** bit.
