Caminetto Event Skin 2020 Limited Special Edition Handmade Pipe

Cod. Caminetto 167

EUR 380,00 / taxfree 311,48

TECHNICAL SPECIFICATIONS

1.	Length	121 mm / 4.76 inch
2.	Bowl height	63 mm / 2.48 inch
3.	Outside diameter	45 mm / 1.77 inch
4.	Chamber diameter	20 mm / 0.79 inch
5.	Chamber depth	40 mm / 1.57 inch
	Weight	53.60 gram / 1.89 oz
	Filter	**NO**
Condition		New
Country		Italy
Brand		Caminetto
Finish		Semi Rusticated
Shape		Bent
Material		Briar-root
Stem		Acrylic
Ornament		Metal
Original bag		of the manufacturer
Original box		of the manufacturer

FEATURES

Handmade in Italy - copper adornments

Free gift wrapping is included

Caminetto Event 2020 Pipe – Semi-Rusticated Stand-Up Skin with Double Copper Band

The **Caminetto** manufacture represents one of the historic brands of Italian pipe craftsmanship. Founded in 1968 in Cucciago from the partnership between Giuseppe Ascorti and Luigi Radice, the brand—famous for its "Mustache" logo—revolutionized the international market in the 1970s thanks to innovative finishing techniques and extraordinary construction quality. After a historic hiatus, production was reborn in the 1980s thanks to Roberto Ascorti

and continues today under the leadership of the Ascorti family, keeping intact the artisanal care and stylistic identity of the Cantù school.

Technical Features and Design of the Event 2020 Skin

This model belongs to the **Event 2020** series and stands out for its complex architecture and a skillful play of chromatic and material contrasts.

- **Stand-Up Geometry and Curvature:** The pipe is a heavily bent shape equipped with a flat base that allows it to balance independently without the aid of a pipe rest (**stand-up**). Despite the slender line and pronounced curvature, the weight distribution is designed to offer maximum comfort when held between the teeth.
- **Semi-Rusticated "Skin" Finish:** The bowl of the pipe features the *Skin* finish, a particular semi-rusticated treatment that enhances the three-dimensional texture of the briar while letting the natural quality of the raw material surface. In an elegant contrast, the **top edge of the bowl (rim)** is finished completely smooth, highlighting the density and color of the wood.
- **Copper Inserts and Stem:** The junction point between the shank and the stem is embellished with a refined technical and aesthetic detail: a **double copper band** applied both on the shank and on the base of the stem. The latter is made of polished black acrylic, molded with a saddle shape (**saddle**) that ensures a linear airflow and a reduced thickness between the teeth.
- **Bowl and Drilling:** The combustion chamber is decidedly spacious, suitable for accommodating a generous load of tobacco for prolonged smoking sessions. The internal drilling is engineered with a geometry that is **slightly conical at the bottom**, a technical feature useful for optimizing the draw in the final stages of the smoke and promoting the complete combustion of the tobacco without accumulations of residual moisture.
