

Radice Rind Oil Cured Straight Rusticated Handmade Pipe

Cod. Radice 2225

EUR 260,00 / taxfree 213,11

TECHNICAL SPECIFICATIONS

1. Length	143 mm / 5.63 inch
2. Bowl height	51 mm / 2.01 inch
3. Outside diameter	42 mm / 1.65 inch
4. Chamber diameter	21 mm / 0.83 inch
5. Chamber depth	42 mm / 1.65 inch

Weight 57.70 gram / 2.04 oz

Filter	NO
Condition	New
Country	Italy
Brand	Radice
Model	Billiard, Pot
Finish	Rusticated, Semi Rusticated
Shape	Straight
Material	Briar-root
Stem	Acrylic
Original bag	of the manufacturer
Original box	Al Pascià

FEATURES

Handmade in Italy (made in 2026)

Oil-cured briar

Free gift wrapping is included

Radice Rind Oil Cured Pipe - Technical Features

The Radice Rind Oil Cured pipe expresses the typical characteristics of Italian artisanal manufacturing, combining a textured finish with precise geometric choices. This medium-sized model falls within the classic standards of the Billiard and Pot shapes.

Geometry and Construction

The design of the pipe is structured to offer stability both during use and when at rest: the base of the bowl is crafted to allow an autonomous **stand-up** posture on smooth surfaces.

The straight silhouette is characterized by **thick and robust walls**. The presence of a significant mass of briar around the combustion chamber contributes to a linear temperature management—a technical feature that makes this model suitable even for those with less experience in managing a smoke (beginners).

The **Rind** finish features a prominent rustication on the body of the bowl, leaving the **flat rim completely smooth and natural**, creating a sharp visual and material contrast.

The Oil Curing Process

The **Oil Cured** classification identifies pipes subjected to a traditional treatment of immersing the briar in vegetable oil before the final seasoning phase. This process acts on the tannins and sap of the wood, promoting the expulsion of internal moisture and modifying the porosity of the briar. From a technical standpoint, Oil Curing significantly reduces the pipe's break-in time and limits the appearance of harsh notes during the first lightings, offering a consistent aromatic yield.

Specifications of Bowl and Stem

- **Bowl:** Features a good internal capacity with a slightly conical drilling, a geometric configuration designed to facilitate the draw and the regular combustion of the tobacco towards the base.
- **Stem:** Made of black acrylic with a tapered profile and a standard button/lip, a choice oriented towards long-term stability and resistance to oxidation.
