

Ser Jacopo L1 A Maxima Straight Chimney Smooth Handmade Pipe

Cod. Ser Jacopo 2311

EUR 330,00 / taxfree 270,49

TECHNICAL SPECIFICATIONS

1. Length	151 mm / 5.94 inch
2. Bowl height	67 mm / 2.64 inch
3. Outside diameter	45 mm / 1.77 inch
4. Chamber diameter	23 mm / 0.91 inch
5. Chamber depth	59 mm / 2.32 inch
 Weight	69.70 gram / 2.46 oz
Filter	NO
Condition	New
Country	Italy
Brand	Ser Jacopo
Model	Chimney
Finish	Smooth
Shape	Straight
Material	Briar-root
Stem	Acrylic
Original bag	of the manufacturer
Original box	of the manufacturer

FEATURES

Hand Made in Italy

Free gift wrapping is included

Ser Jacopo L1 A Maxima Pipe - Stand-Up Square Shank Chimney

The Ser Jacopo L1 A Maxima pipe represents an emblematic example of the fine craftsmanship of the Pesaro school. This specific artifact expresses the Marche workshop's ability to push beyond classic standards through an accurate study of proportions and volumes, offering a piece of remarkable visual and structural impact.

Geometry, Proportions, and Maxima Balance

The model is a Chimney shape characterized by large dimensions. The design peculiarity of this creation lies in a sought-after and intentional disproportion: the height and majesty of the bowl contrast sharply with the tighter lines of the shank.

The shank is crafted with a **square cross-section**. Despite the vertical development and the height of the bowl, the pipe is designed to be a **stand-up**: the combination of the flat base of the bowl and the lower linearity of the square shank allows the artifact to rest in a stable and autonomous manner on smooth surfaces.

The **L1** classification identifies the **smooth finish**, while the **A Maxima** designation attests to its membership in the generous and out-of-standard size series of the Ser Jacopo catalog.

Specifications of the Bowl and Stem

- **Bowl:** Characterized by a very capacious capacity, optimal for long smokes. The combustion chamber features a **regular cylindrical drilling**, which maintains a constant diameter throughout the remarkable depth of the chamber, ensuring a uniform draw.
- **Stem:** Made of glossy black acrylic, a material that preserves its shine over time and resists oxidation. The profile is a **saddle stem** and geometrically connects to the square shank, ending with a slightly **fishtail** shape to optimize palatal comfort and stability between the teeth. The classic distinctive logo insert of the brand is present on the top.
