Finish	Semi Rusticated
Shape	Bent
Material	Briar-root
Stem	Acrylic
Ornament	Acrylic, Bamboo
Original bag	of the manufacturer
Original box	Al Pascià

FEATURES

Handmade in Spain

Free gift wrapping is included

Rafael Arzuaga Calumet Freeform Bent Pipe

A curved, Calumet-inspired freeform pipe, entirely handmade in Spain by Rafael Arzuaga. This one-of-a-kind piece perfectly embodies the artisan's sculptural vision, combining the organic character of natural materials with the technical precision of expert craftsmanship.

Pipemaker Rafael Arzuaga and His Creative Philosophy

Rafael Arzuaga is a self-taught artisan who has been making pipes for over twenty years. His production, rooted in Spain and developed together with his wife, Zuzel Rodriguez Rivero — who pays particular attention to surface finishing — is renowned for the creation of one-of-a-kind pieces inspired by nature, music, and the human figure.

Arzuaga is distinguished by his distinctive mastery in integrating natural and exotic materials. Among his most appreciated designs are his interpretations featuring bamboo inserts.

Technical Specifications

Pipemaker: Rafael Arzuaga (Spain)

Shape: Curved Freeform (Calumet-inspired)

Finish: Semi-rusticated

One-of-a-kind: Yes

Chamber: Medium capacity, with cylindrical drilling

Shank Inserts: Bamboo and acrylic accent, ferrule and end cap

Stem: Marbled acrylic with Fishtail bit

Aesthetic Analysis and Smoking Engineering

Calumet Silhouette and Semi-Rusticated Finish:

This design offers a modern reinterpretation of the classic Calumet shape, developing a fluid and well-balanced curved line. The semi-rusticated briar provides a pleasing tactile quality while creating a rich textural and chromatic contrast with the smooth sections left exposed.

Bamboo and Acrylic Insert:

The shank is enhanced by a distinctive bamboo node, complemented by acrylic elements that add an exotic and refined touch to the overall design.

Chamber and Stem Engineering:

The medium-capacity chamber is well suited to optimal tobacco loading and management. The drilling is cylindrical. The stem is made from marbled acrylic and features a fishtail bit, providing a comfortable and stable position between the teeth.
