

Ganci 2F Smooth Bent Briar Tomato Pipe

Cod. Ganci 086

EUR 800,00 / taxfree 655,74

TECHNICAL SPECIFICATIONS

1. Length	117 mm / 4.61 inch
2. Bowl height	45 mm / 1.77 inch
3. Outside diameter	53 mm / 2.09 inch
4. Chamber diameter	19 mm / 0.75 inch
5. Chamber depth	39 mm / 1.54 inch

 Weight	72.60 gram / 2.56 oz
---	----------------------

Filter	NO
Condition	New
Country	Italy
Brand	Accademia della Pipa
Model	Freehand, Tomato, Chubby
Finish	Smooth
Shape	Bent
Material	Briar-root
Stem	Ebonite
Ornament	Acrylic
Original bag	of the manufacturer
Original box	Al Pascià

FEATURES

Handmade in Italy

Free gift wrapping is included

Francesco Ganci Handmade Italian Pipe - Freehand F F

Handcrafted in Liguria, Italy, by **Francesco Ganci**, this artisan-made pipe is an **F F grade freehand**, defined by a compact, slightly chubby profile and a gently curved overall configuration.

The **natural smooth finish** leaves the briar largely unadorned, allowing the grain and inherent character of the wood to remain the

principal visual elements. The shaping demonstrates a considered use of **cuts, facets and controlled geometric transitions**, which articulate the bowl and shank while maintaining continuity throughout the form.

The bowl is **generously proportioned**, with a substantial chamber drilled on a **slight taper**. Its internal geometry is carefully integrated with the external shaping, producing a coherent relationship between chamber, bowl walls, shank and overall mass distribution.

The stem is cut from **ebonite** and terminates in a traditional **fishtail button**. The stem-to-shank junction is defined by a substantial **Elforyn accent**. Elforyn is a high-density mineral-based composite material developed as an ivory alternative; it is valued for its fine, homogeneous structure, machinability and ivory-like appearance, while being entirely free of natural ivory.

The generous Elforyn accent is proportioned as an integral element of the stem assembly. Once the stem is fully seated, it creates a broad, visually continuous transition into the shank, emphasizing the deliberate geometry of the junction rather than functioning merely as a decorative insert.

The shaping is particularly notable for its **controlled interplay of volume and geometry**. The slightly chubby bowl is balanced by the curved profile and carefully managed transitions along the shank, while the use of selected cuts gives definition to an otherwise organic freehand silhouette.

A technically considered example of **Francesco Ganci's Ligurian pipe making**, this piece combines freehand shaping with precise stem work, a substantial tapered chamber and a distinctive Elforyn stem accent.

Pipe maker: Francesco Ganci

Origin: Liguria, Italy

Grade: F F

Shape: Freehand, slightly chubby, curved

Finish: Natural smooth

Stem: Ebonite, fishtail button

Accent: Elforyn

Chamber: Generous, slightly tapered

Construction: Artisan handmade
