Big Ben R-Design Red Polish Pot Pipe

Cod. Big Ben 1279

EUR 189,00 / taxfree 154,92

TECHNICAL SPECIFICATIONS

1.	Length	141 mm / 5.55 inch
2.	Bowl height	45 mm / 1.77 inch
3.	Outside diameter	39 mm / 1.54 inch
4.	Chamber diameter	21 mm / 0.83 inch
5.	Chamber depth	38 mm / 1.50 inch
	Weight	49.70 gram / 1.75 oz
	Filter	**YES**
Condition		New
Country		Netherlands
Brand		Big Ben
Model		Pot
Finish		Smooth
Shape		Straight
Material		Briar-root
Stem		Acrylic
Ornament		Metal
Original bag		of the manufacturer
Original box		of the manufacturer

FEATURES

Made in Holland - Replica Design

9mm filter pipe

9mm adapter for smoking without filter included

Free gift wrapping is included

Big Ben R-Design 484 Red Polish Pipe – Dutch Engineering and Contemporary Style

Big Ben's R-Design Series: The Meeting Point Between Tradition and Innovation

For over a century and a half, the historic Dutch manufacturer Big Ben has been synonymous with smoking instruments that combine construction reliability, briar quality, and daily functionality. With the R-Design line, the Dutch brand opens a contemporary chapter in its history, offering a perfect synthesis between fine classic craftsmanship and modern industrial design. The 484 model stands out within the series due to a slenderer and slightly more compact profile compared to the other shapes in the same collection.

Technical Specifications and Construction Details

- **Architecture and Cooling Fins:** The pipe develops on an essential, clean straight shape. The distinctive element of the bowl is the presence of deep radial cooling fins. In addition to conferring a strong visual impact and a modern geometric look, these grooves increase the thermal exchange surface area of the briar, contributing decisively to optimal heat dissipation during the smoke.
- **Finish and Metal Inserts:** The design is completed by metal inserts that serve as both structural reinforcement and a stylistic accent: the pipe is in fact equipped with a refined metal band at the shank connection and a practical metal flame guard that covers the rim (upper edge) of the bowl, protecting the briar from lighting.
- **Internal Engineering and Bowl:** The bowl has a medium capacity, ideal for ordinary smoking sessions. The internal drilling is slightly conical. The shank is internally designed to accommodate 9 mm filters, ensuring a cool, dry smoke free of impurities.
- **Stem:** The model is fitted with a tapered stem made of glossy black acrylic. The choice of acrylic ensures that the component retains its luster over time, stably resisting oxidation caused by salivation.
