Ser Jacopo Delecta S2 Leonardo E Bent Pipe

Cod. Ser Jacopo 2323

EUR 450,00 / taxfree 368,85

TECHNICAL SPECIFICATIONS

1.	Length	156 mm / 6.14 inch
2.	Bowl height	55 mm / 2.17 inch
3.	Outside diameter	50 mm / 1.97 inch
4.	Chamber diameter	19 mm / 0.75 inch
5.	Chamber depth	42 mm / 1.65 inch
	Weight	106.80 gram / 3.77 oz
	Filter	**NO**
Condition		New
Country		Italy
Brand		Ser Jacopo
Model		Billiard, Pot
Finish		Sandblast
Shape		Bent
Material		Briar-root
Stem		Acrylic
Ornament		Silver
Original bag		of the manufacturer
Original box		of the manufacturer

FEATURES

Hand Made in Italy

Free gift wrapping is included

A fascinating discovery: the pipe which does not yet hot. In 1982 Professor Enrico Fabri discovered a four page document which contained several inventions which seemed like something created by Leonardo da Vinci. Numerous studies were carried out on these four pages: on the pigments, the materials and the writing style; a carbon 14 test was also carried out to scintifically determine the outhorship and age of the document: a Leonardo da Vinci from 1510. Among the studies contained in the document there is one

which mentions a specific request by Louis XII, the King of France: a pipe which would remain as cool as possible. Leonardo da Vinci devised a twin-walled terracotta pipe which was cooled by the air circulating in the cavity. Now Ser Jacopo has risen to the challenge of creating Leonardo da Vinci's project and make it tangible using the same tecnichal means but in a different material: briar. And this has led to the creation of "Leonardo", the pipe that doe not get hot, an object rich in history and genius.

Ser Jacopo Leonardo S2 Delecta E Pipe – Sandblasted Billiard/Pot with Silver Trim

*The **Ser Jacopo Leonardo S2 Delecta E** is an extraordinary expression of Pesaro's pipe-making heritage, blending a classic silhouette with exclusive design details. Sitting beautifully between the historic Billiard and Pot shapes, this model is distinguished by its commanding, large dimensions.*

Aesthetics, Finish, and the Exclusive "Leonardo" Detail

*The body of the pipe is enhanced by a **light yet defined light-brown sandblast**, a finish that highlights the natural grain of the briar while offering a warm, structured tactile feel.*

What makes the Leonardo series truly unique is a detail of supreme craftsmanship:

- ***The Rim Inlay:** The top of the bowl features a masterfully executed inlay of a silver band directly into the rim. This seamless, handcrafted integration adds a unique architectural prestige to the overall design.*

Visual Continuity in Sterling Silver

In keeping with the finest traditions of the Delecta line, silver serves as the cohesive thread tying the pipe's components together:

- ***The Delecta Band:** Inset on the shank is the traditional, finely crafted Sterling silver band, bearing the Ser Jacoposignature and the official hallmark of the precious metal.*
- ***The Stem:** Made of polished black acrylic, it houses a second silver band that mirrors the one on the shank, creating a refined visual continuity and a perfect color contrast with the light-colored briar.*

Chamber Geometry

*From a functional perspective, the pipe features a **highly capacious chamber with a regular, cylindrical bore**.*
