Ser Jacopo Pipe – S2 A Maxima (Sandblasted Half-Bent Chimney)

Crafted in the historic workshop in Pesaro, this creation by **Ser Jacopo** belongs to the **S2 A Maxima** grading, reserved for pipes distinguished by their impressive dimensions and the exceptional quality of the briar. The pipe features an interpretation of the **Chimney** shape, characterized by the vertical sweep of the bowl and generous overall proportions.

Detailed Features and Construction

This piece combines a classic design with meticulous surface craftsmanship and precise internal mechanics:

- **Finish and Ring Grain:** The deep sandblasting highlights the prominent concentric ring grain structure of the briar, giving the surface a distinct tactile texture and a strikingly regular visual appearance.
- **Bowl and Tobacco Chamber:** The bowl provides a very high capacity, ideal for long smoking sessions. The internal drilling features a constant cylindrical cross-section to ensure a smooth, even airflow throughout the entire depth of the chamber.
- **Stem and Proportions:** The elongated stem is made of black acrylic with a saddle bit design. The button features a wider *fishtail* shape, engineered to evenly distribute the smoke flow and provide a stable, comfortable grip for the bite.
