Shape Geometry and Smoking Performance

The **5128 model code** identifies a medium-sized pipe (Group 5), characterized by a distinctive, flattened apple-shaped bowl with a semi-curved profile. The Diplomat shape offers a particularly comfortable grip, while the moderate curvature of the shank helps position the centre of gravity in a balanced, lower position.

The **fine sandblasted finish** enhances the natural grain of the briar while protecting the surface and promoting heat dissipation. Contrasting with the textured finish of the bowl, the **smooth, flat rim** highlights the upper section of the pipe, creating a clean visual transition between the two finishes.

Craftsmanship, Precision and Ergonomics

The **medium-capacity chamber** benefits from a carefully executed **cylindrical bore**, designed to ensure a consistent airflow.

The shank accommodates a **tapered Cumberland ebonite stem** with a standard button, meticulously finished to provide a stable and comfortable fit between the teeth. The unmistakable **White Spot** stands out on the upper side of the stem, serving as a historic symbol of British craftsmanship and a hallmark of the brand's commitment to quality.
