

Alinetu Volcano Smooth Pipe

Cod. Alinetu 015

EUR 600,00 / taxfree 491,80

TECHNICAL SPECIFICATIONS

1. Length	142 mm / 5.59 inch
2. Bowl height	62 mm / 2.44 inch
3. Outside diameter	44 mm / 1.73 inch
4. Chamber diameter	21 mm / 0.83 inch
5. Chamber depth	51 mm / 2.01 inch
 Weight	68.80 gram / 2.43 oz

Filter	NO
Condition	New
Country	Italy
Brand	Accademia della Pipa
Model	Freehand, Volcano
Finish	Smooth
Shape	Bent
Material	Briar-root
Stem	Cumberland
Ornament	Horn
Original bag	of the manufacturer
Original box	Al Pascià

FEATURES

Handmade in Italy

Free gift wrapping is included

Alinetu by Daniele Carbini: The Philosophical Expression of the Volcano Shape in Sardinian Briar

Alinetu pipes are the result of a profound connection with the land and an extraordinary intellectual sensibility. Crafted by Daniele Carbini — an artisan, philosophy graduate, writer, and proud guardian of Sardinia's traditions — these creations take their name from a locality in Tempio Pausania, in the heart of Gallura, where

the family's land and mill are located.

A member of the prestigious Accademia della Pipa since its foundation, Daniele Carbini approaches briar craftsmanship as a genuine act of **maieutics**: rather than imposing a preconceived shape on the wood, he engages in a dialogue with the grain of the briar block to reveal the silhouette concealed within it. The result is a unique smoking instrument that combines an archaic aesthetic with sophisticated design.

Design and Craftsmanship: The Volcano Shape and Natural Bark

This pipe features a curved profile and medium-to-large proportions, characterized by an imposing yet perfectly balanced design.

- **Volcano Geometry:** The silhouette reinterprets the classic Volcano shape, with a bowl that tapers towards the top and a broad base that provides visual stability and ergonomic balance.
- **Natural Smooth Finish and Top Bark:** The pipe's body features a natural smooth finish that enhances the warm tones of the briar without concealing them beneath opaque treatments. At the base of the bowl, the artisan has chosen to preserve the **top bark**, the natural outer bark of the briar block, creating a striking textural contrast that evokes the wood's living, primordial origins.

Fine Materials: Natural Horn Ferrule and Cumberland Stem

The junction between the shank and the stem is enhanced by a refined combination of premium materials.

- **Natural Horn Ferrule:** The end of the shank is fitted with an elegant, hand-crafted natural horn ferrule, providing an organic and harmonious transition between colours.
- **Cumberland Stem:** The stem is made from Cumberland, a variegated ebonite featuring warm reddish and brown tones. It is carefully shaped to ensure a stable, comfortable fit between the teeth and an even distribution of smoke.

Bowl Geometry and Smoking Performance

- **Generously Sized Bowl:** The ample proportions of the bowl accommodate a large tobacco chamber, making this pipe ideal for slow, extended smoking sessions or for savouring complex tobacco blends.
- **Cylindrical Bore:** The tobacco chamber features a precisely executed cylindrical bore, engineered to ensure a smooth, consistent draw without turbulence, from lighting through to the bottom of the chamber.

Technical Specifications at a Glance

- **Artisan / Brand:** Daniele Carbini — Alinetu
- **Origin:** Tempio Pausania, Gallura, Sardinia, Italy

- **Shape:** Curved Volcano
- **Size:** Medium to large
- **Finish:** Natural smooth finish with top bark preserved at the base of the bowl
- **Bowl:** Generous capacity with a precision-drilled cylindrical chamber
- **Ferrule:** Natural horn
- **Stem:** Variegated Cumberland
- **Type:** Unique handcrafted pipe for collectors and tobacco enthusiasts
