Ganci 2F Free Form Pipe

Cod. Ganci 094

EUR 800,00 / taxfree 655,74

TECHNICAL SPECIFICATIONS

1.	Length	126 mm / 4.96 inch
2.	Bowl height	47 mm / 1.85 inch
3.	Outside diameter	54 mm / 2.13 inch
4.	Chamber diameter	19 mm / 0.75 inch
5.	Chamber depth	38 mm / 1.50 inch
	Weight	76.60 gram / 2.70 oz
	Filter	**NO**
Condition		New
Country		Italy
Brand		Accademia della Pipa
Model		Freehand, Chubby
Finish		Smooth
Shape		Half bent
Material		Briar-root
Stem		Ebonite
Ornament		Wood
Original bag		of the manufacturer
Original box		Al Pascià

FEATURES

Handmade in Italy

Free gift wrapping is included

Francesco Ganci: Ligurian Craftsmanship in a Freehand Semi-Bent Shape

Within the world of Italian artisan pipe making, **Francesco Ganci** stands out for his sculptural and tactile approach to briar. Working in the heart of Liguria, the artisan allows the natural volumes of the wood to guide his designs, creating unique pieces that combine the balance of classical shapes with a distinctive sense of creative

freedom.

Design and Geometry: The Comma-Like Curve of the Shank

This pipe is a compact, medium-sized **freehand shape**, characterised by a semi-bent profile and a particularly harmonious visual flow.

- **Comma-Like Shank:** The broad, flattened shank develops into a fluid, asymmetrical comma-like curve, lending dynamism to the overall design and naturally guiding the eye towards the mouthpiece junction.
- **Bark Top Detail:** At the junction with the band, the artisan has deliberately preserved the visible **bark top**, the natural outer surface of the briar plateau. This organic detail reveals the natural origin of the briar block, creating a striking yet elegant textural contrast with the finished surface of the shank.
- **Natural Smooth Finish:** The natural finish highlights the purity of the wood, allowing the briar's natural grain to emerge without being obscured by opaque stains or coatings.

Details and Materials: Olive Wood Band and Ebonite Mouthpiece

The junction between the shank and mouthpiece is enhanced by carefully selected materials:

- **Olive Wood Band:** The mouthpiece is fitted with a refined band made of olive wood, a material closely associated with the Ligurian landscape. Its golden grain creates a warm colour contrast with the briar body.
- **Handcrafted Solid-Rod Ebonite Mouthpiece:** The black ebonite mouthpiece is turned and hand-finished directly from solid rod stock. Its fishtail bit provides a slim, stable and comfortable position between the teeth.

Bowl Geometry and Smoking Characteristics

- **Medium-Capacity Bowl:** The tobacco chamber offers carefully balanced proportions, allowing the tobacco charge to be managed comfortably. Its capacity makes it suitable for both complex blends and everyday tobacco enjoyment.
- **Balanced Draught:** The semi-bent configuration, combined with precision internal drilling, is designed to provide a smooth and consistent airflow from the initial lighting down to the bottom of the chamber.
