Karin Pipe: Organic Sculpture and Flame-Grain Briar in a Horn Shape

Entirely handcrafted in Italy, this pipe bears the signature of **Karin**, an artist and pipe maker whose creative vision stems from a background in the visual arts and a three-dimensional understanding of space. Having discovered the lathe through observing the masters of the Danish school, Karin has developed her

own distinctive style, evolving from an initially rigorous design approach towards a deeply instinctive and material-driven form of expression.

Her creations — distinguished by a logo inspired by the cardinal points — are instantly recognizable for their full, dense and enveloping volumes, translating a contemporary sculptural sensibility into the compact dimensions of an artisan pipe.

Design and Sculpture: The Horn Shape with a Sculpted Wave Back

In this piece, Karin reinterprets the classic **Horn shape** through a strongly sculptural language, achieving a masterful balance between the briar's organic form and meticulous hand-carving:

Dynamic Silhouette and Sculpted Back: Built around a flowing, elongated curved line, this pipe stands out for its back, shaped with soft, hand-carved waves. This distinctive tactile and visual detail guides the light along the entire profile.

Smooth Honey and Hazelnut Finish: The smooth surface finish, illuminated by warm honey and hazelnut tones, highlights the exceptional quality of the briar. Both sides feature dense **angel hair flame grain**, while the underside reveals a beautiful field of **bird's-eye grain**.

Natural Plateau Base: Along the bottom of the pipe, a striking section of natural plateau (the outer bark of the briar burl) has been preserved. The artisan's hallmarks are discreetly stamped onto it, bearing witness to the wood's authentic, natural origins.

Construction Details: Warthog Tusk Ferrule and Ebonite Mouthpiece

The transition between the briar body and the mouthpiece is achieved through the use of noble materials, crafted with meticulous attention to detail:

Warthog Tusk Ferrule: The end of the shank is enhanced by an organically shaped **warthog tusk ferrule**, introducing a warm, ivory-toned contrast that perfectly complements the briar's natural colour palette.

Handcrafted Ebonite Mouthpiece: The curved, tapered mouthpiece is made from black ebonite, hand-polished to a glossy finish. Its shape flows seamlessly into the ferrule's profile, providing a slim, well-balanced and comfortable fit while smoking.
